

STRATEGY – MALAYSIA

Alpha Picks: A Variety Of Event Drivers

Our Alpha Picks outperformed the FBMKLCI in Sep 24 (+3.7% vs -1.8%) as hoped, partly reversing Aug 24's stark underperformance; nevertheless, our Alpha Picks have still neatly outperformed the FBMKLCI ytd. Our Oct 24 Alpha Picks embrace a variety of event-driven picks. Oct 24 picks: EcoWorld, Gamuda, Lagenda, MYEG, Pekat, RHB Bank, RGB, Sime Darby, VSI and Yinson.

WHAT'S NEW

- **Market review for Sep 24.** The FBMKLCI fell 1.8% in Sep 24. Prominent winners within the KLCI sectors included healthcare (+14.2%), property (+6.3%), building materials (+2.6%) and consumer (+2.3%) while major losers were the shipping subsector of oil and gas (-6.1%), plantation (-1.2%) and gaming (-1.1%). Looking to the non-KLCI segment, gloves (+9.2%), construction (+5.8%) and manufacturing (+5.6%) were the standout winners. Losers spanned the technology and oil and gas subsectors (see overleaf table for details).
- **Sep 24 Alpha Picks provided part redemption from Aug 24's abysmal performance,** rising 3.7% vs Aug's 9.2% fall, thereby outperforming the FBMKLCI by 5.5% for the month (see RHS table). Major winners were Alpha IVF (+15.6%), EcoWorld (+15.5%) and Gamuda (+7.7%). Conversely, Yinson (-6.6%) and Public Bank (-5.4%) were losers in Sep 24.
- **Sticking to the variety of investment themes, while adding China mega fiscal stimulus plans as an additional catalytic event driver.** Our Alpha Picks are chosen to capitalise on foreign equity inflows (which favour selected banks) and near-term alpha events, including more newsflow on Iskandar 2.0 (eg details of the Special Economic Zone), further data-centre related land sales, blockchain, e-government project awards, M&As (Yinson is widely expected to deeply monetise its FPSO assets) and beneficiaries of China's mega fiscal stimulus. A notable confidence booster is RGB International's recent clarification that last year's Malaysian Anti-Corruption Commission (MACC) assistance case has been resolved.
- **Meanwhile, concerns of lumpy forex loss for US dollar earners mostly discounted.** Although the market has been wary of US dollar income earners needing to recognise lumpy forex translation losses in the upcoming reporting season (given the sharp rise in the ringgit against the USD), we retain RGB International and VS Industry in our Alpha Picks. These concerns have been mostly priced in as reflected in the stocks' significant share price retreats from their respective highs in Sep 24, while we look forward to fresh re-rating catalysts.
- **Oct 24 picks: Eco World Development (EcoWorld), Gamuda Berhad, Lagenda Properties (Lagenda), M.Y. E-Government Services (MYEG), Pekat Group, RGB International, RHB Bank, Sime Darby, VS Industry and Yinson Berhad (Yinson).** New joiners are Sime Darby and RHB Bank (a higher beta and valuation laggard in the banking sector), which replace Public Bank and impressive outperformer Alpha IVF.

ANALYSTS' TOP ALPHA\* PICKS

Analyst	Company	Rec	Performance#	Catalyst
Nazira Abdullah	Eco World Development	BUY	14.0	Proxy to Iskandar Malaysia 2.0 investment theme, with opportunities to monetise its industrial landbank.
Jack Goh, Jack Lai	Gamuda	BUY	30.3	Robust earnings growth ahead, backed by a sturdy orderbook and bright replenishment outlook.
Nazira Abdullah	Lagenda	BUY	7.1	Pure play affordable housing developer with the highest ROE of 17%. Stronger 2H24 earnings anticipated.
Jack Goh	My E.G. Services	BUY	12.7	Anticipated launches of AI/blockchain initiatives eg China-centric eCNY and ZTrade, and WorldID and MyDigitalID.
Chong Lee Len	Pekat Group	BUY	(2.1)	Set to capitalise on the long-term structural growth in solar energy demand. M&As will fuel growth.
Jack Goh	RGB International	BUY	31.0	Substantially stronger 3Q24 earnings anticipated. Offers an appealing yield of 8-10%.
Keith Wee	RHB Bank	BUY	n.a.	Lower-than-expected credit cost and stronger-than-expected non-interest income. Trades at -1.0 SD to mean P/B and is perceived as a high beta laggard.
Anas Fitri Ahmad	Sime Darby	BUY	n.a.	Anticipate earnings lift from UMW's contribution and China market recovery, with sales to the China market accounting for around 26%.
Desmond Chong	VS Industry	BUY	11.2	Strong earnings in 2HFY24 partly driven by vertical integration; additional impetus from Philippines venture.
Kong Ho Meng	Yinson	BUY	(4.6)	FPSO division: Plans for a pre-IPO (US\$1b) and US IPO (valued >US\$3b) by 2026, charter of two Brazil FPSOs, and stake sale of Anna Nery.

**Eco World Development – BUY (Nazira Abdullah)**

- **Market leader in Iskandar Malaysia.** Eco World's (ECW) role in Iskandar Malaysia goes beyond just a presence – its developments are seen as a direct proxy to the region's growth story. Since launching Eco Botanic in 2013, ECW has leveraged Iskandar's strategic location, particularly its proximity to Singapore, to cater to cross-border investments and attract both residential and commercial buyers. The company has since expanded with notable projects like Eco Business Parks and Eco Tropics, aligning itself closely with Iskandar's economic transformation. As infrastructure like the Johor Bahru-Singapore RTS Link progresses, ECW's developments are increasingly viewed as beneficiaries, reflecting the potential upside from Iskandar Malaysia's continued growths. Currently, ECW has 1,529 acres of landbank in Iskandar Malaysia (total landbank: 3,426 acres) with GDV of RM13b (total remaining GDV: RM52b). Its landbank in Iskandar Malaysia is strategically located in Kulai and Iskandar Puteri.
- **One of the largest industrial landowners in Iskandar Malaysia.** ECW currently has five business parks - four in Iskandar Malaysia and one in the Klang Valley (total industrial landbank: 1,176 acres; GDV: RM5.8b). In just a decade since its inception, ECW has generated RM31.9b in sales from Malaysian projects, with RM4.4b from business parks (30% of FY23 total sales vs 10% of FY14-19 total sales). Notably, the business parks segment has seen remarkable sales growth since FY20, achieving a four-year CAGR of 68%. In Iskandar Malaysia, we find that ECW's industrial landbank is the largest among developers, with nearly 800 acres remaining and a GDV of at least RM3.6b.
- **Continued expansion and growth.** ECW is well-positioned to further capitalise on Johor's burgeoning industrial sector, aligning with Johor's vision of becoming a regional economic powerhouse like Shenzhen. Malaysia's high level of approved investments, particularly in states like Johor, and the recent launch of the New Industrial Masterplan 2030 (NIMP 2030), focusing on industrial growth and resilience, make it an attractive destination for investors seeking diversification. We anticipate sustained growth in industrial demand, supported by government initiatives/incentives. We think the incentives will encourage foreign companies to participate in the JS-SEZ development. Moreover, we expect prudent measures from the state government to prevent oversupply in the industrial property market. Our channel checks indicate that all industrial properties launched by developers were sold out, indicating robust demand.
- **Taking a QUANTUM leap.** ECW's new industrial revenue pillar QUANTUM is tailored for data centres, digital and high-tech ventures. It offers a perfect environment for data centres and high-tech industries, with strong infrastructure, excellent connectivity and a clean, green setting. QUANTUM aims to attract a wider range of industrialists and service providers in the data centre, digital and high-tech manufacturing sectors. We are positive on ECW's new industrial revenue which exemplifies its dynamic and forward-thinking strategy by capitalising on the vibrant industrial segment, particularly in the burgeoning data centre industry.
- **Maintain BUY with target price of RM2.10.** Our target price is based on a 40% discount to RNAV of RM3.42 and implies 16-20x FY24-26F PE (lower than its 10-year average of 32x; lower than current peers' average of 22x FY24F PE) and 1.2x-1.3x FY24-26F P/B (10-year average: 0.9x). Notably, during the property upcycle back in 2012-14, ECW traded at a premium of 1.6x P/B (+3SD to mean) and 30% discount to its RNAV. We like ECW for its improving balance sheet and ROE, decent dividend yield of 4-5% as well as its leading position in the property sector.

**SHARE PRICE CATALYST**

- **Event:** Stronger-than-expected earnings (ECW typically surprises on the upside for its 4Q results), more data centre deals for QUANTUM business park, more Johor land acquisition.
- **Timeline:** 2H24-2025.

**KEY EVENTS IN SEP 24**

- Corporate**
- IHH Healthcare announced the purchase of the historic Penang Island Hospital from Comprehensive Care Sdn Bhd for RM3.9b
  - Mr DIY may list its Indonesian unit in Jakarta as soon as this year or early 25
  - Heitech Padu has emerged as the frontrunner to bag the RM1b NISe contract, according to *The Edge*
  - 99 Speed Mart had its IPO on 9 Sep 24, the largest IPO on Bursa Malaysia in seven years
  - Capital A said Bursa has approved its EGM circular regarding the proposed disposal of its aviation business to AirAsia X. An EGM will be held in the next three weeks
  - Press Metal Aluminium has teamed up with Indonesian companies to operate an alumina refinery plant in Indonesia with an annual capacity of 1.2m tonnes and a total cost of US\$750m
  - TNB has inked an agreement with Singapore's Keppel Electric to supply 100MW of electricity to the island state

- Economics**
- BNM kept OPR rate unchanged at 3% after the last monetary policy meeting
  - Malaysia secured RM85.4b in FDI during 1H24 and RM160b in approved investments, led by investments from Austria, Singapore and China
  - Jul IPI: up 5.3% yoy, driven by strong manufacturing output and higher than June's 5%
  - Aug inflation at 1.9%, lower than the previous month's 2%

- Others**
- The Agong Sultan Ibrahim Iskandar conducted his first overseas visit since being crowned in July, visiting China for a four-day trip

Source: Bloomberg, UOB Kay Hian

**Gamuda – BUY (Jack Goh)**

- **Exceptionally strong construction orderbook guidance going into FY25.** While Gamuda's orderbook stood high at RM24.8b as of end-FY24, management guided for a potential orderbook range of RM30b-35b by end-24 and RM40b-45b by end-25. Management remains optimistic that several domestic and overseas projects will materialise in the upcoming months, which include a bundle of private sector and infrastructure projects.
- **Property development division still cementing group's excellence.** While Gamuda's property division recorded stellar FY24 sales of RM5b (+22% yoy), management remains confident about achieving the new sales target of RM6b in FY25 (+20% yoy), which will be largely augmented by better contributions from local launches and Vietnam's quick turnaround projects.
- **Margin expansion a key catalyst for FY25.** For FY25, Gamuda expects meaningful orderbook growth and construction work recognition from local projects. The current construction revenue from local and overseas project ratio of 86:14 is expected to improve to 70:30 in FY25, which will lift overall group margin (domestic projects entail much higher margins). For the property segment, margins are also likely to trend higher on better launches and take-up rates.
- **Maintain BUY with a target price of RM9.16,** which implies an appealing 23.0x FY25F PE (1.5SD above the five-year historical mean of 15x). Gamuda stands to be the prime beneficiary of the upcoming mega infrastructure projects both locally and regionally. We also like the company for its superior earnings visibility backed by a robust orderbook coupled with progressive new property launches.

**SHARE PRICE CATALYST**

- **Event:** Finalisation of the Upper Padas Hydroelectric Dam in Sabah and Penang Mutiara LRT Segment 1. Potential inclusion on the KLCI index in the upcoming review.
- **Timeline:** Finalisation of projects in 2H24-1H25. Potential KLCI inclusion in Dec 24 review.

**My E.G. Services – BUY (Jack Goh)**

- **Zetrix continues to offer deep monetisation potential...** Zetrix's potential is gaining more clarity with the recent commercial launch of Ztrade's two-way cross-border services with China's customs. The key scope of services includes the issuance and authentication of the certificate of origin, smart contract information verification and blockchain-based digital signing. We expect more Zetrix token sales throughout 2024 as the customs project is commercially launched and starts generating transaction fees and gas fees which are settled with Zetrix tokens.
- **...supported by robust coin sales.** For 2024-25, we are forecasting 4.5m-5.0m Zetrix coin sales at an average price of US\$12, which translates into RM200m-220m profit before tax (PBT). There may be upside to our current forecasts if MYEG's exchange-traded fund application in Hong Kong, which includes Zetrix coins, is successful.
- **Earnings accretion from Worldcoin project.** We understand that MYEG has been appointed by Worldcoin to provide infrastructure services and operate the blockchain-enabled iris scanning (US\$10 revenue/scan). There is no major capex of software integration required for Worldcoin's iris scanning so the project should be earnings-accretive to MYEG when it starts. To add on, there may also be cooperation on Malaysia and China's national ID available on Zetrix's ecosystem. We conservatively forecast around 100,000 sign-ups in 2024, which will add close to RM5m in revenue to the group.
- **E-government services holding up well.** The official extensions of MYEG's concessions – *Jabatan Pengangkutan Jalan (JPJ)* (announced) and the immigration department (expected soon) – should provide a level of support for MYEG's core e-government segment in the near to medium term. Recall that the introduction of digital road tax

renewal by JPJ did not significantly (around 5% volume reduction) affect MYEG in 1Q23 and immigration service contributions have remained relatively robust. For the latter, the eventual easing backlog of foreign worker matching services (currently still in the tens of thousands) should be offset by the heightened foreign worker renewal income.

- **Maintain BUY and target price of RM1.42**, which implies 16x 2025F PE (-0.5SD below five-year mean).

#### SHARE PRICE CATALYST

- **Event:** Official rollout of Malaysia National ID and World ID services.
- **Timeline:** Rollout of Malaysia National ID and World ID services in 2H24.

#### Lagenda Properties – BUY (Nazira Abdullah)

- **One of Malaysia's biggest pure play affordable housing players.** Lagenda stands out in the affordable housing segment by prioritising single-storey landed housing units priced below RM300,000 for the underserved B40 and lower-M40 groups. We estimate that its newly launched housing units make up 40-50% of Malaysia's newly launched landed residential property priced below RM300,000. This commitment to affordability has not hurt profitability, as Lagenda boasts higher margins than its competitors, with an average EBIT margin of 30% (industry average: 21%) and net margin of around 20% (industry average: 13%). The profitability is due to Lagenda's low land costs (land cost-to-GDV ratio: 5-7%), efficient construction methods (industrialised building system), strategic partnerships with contractors, and in-house material sourcing which enables cost optimisation.
- **Positioned to capitalise on untapped demand for affordable houses.** Based on 2023 National Property Information Centre (NAPIC) data, 53% of residential transactions in Malaysia involved affordable housing, with each project having a 95% take-up rate within the first year of launch. With a huge proportion of buyers being public sector employees (who can tap government financing schemes), Lagenda's business model is resilient to economic fluctuations, highlighting the company's profitable and sustainable approach to affordable housing.
- **Lagenda is proactively expanding its presence nationwide to address the affordability challenge**, starting from Perak and extending to Kedah, Pahang, Selangor and Johor. Its largest landbank exposure is in Johor, where it is opportunely placed to capitalise on the state's growth fuelled by economic incentives and infrastructure projects such as the rapid transit system. Lagenda's remaining landbank stands at 5,887 acres (including option land and recent Kedah land acquisition) with remaining GDV of RM15.9b.
- **Maintain BUY with a target price of RM2.32.** Our target price is based on a 30% RNAV discount to estimated RNAV of RM3.31, within its five-year historical average discount as well as largely in line with peers' current average. Lagenda is a legend in the affordable space segment as it has higher profitability than its competitors, attributed to its advantageous low land costs (with a land cost-to-GDV ratio of 5-7%), efficient construction methods (utilising industrialised building systems), strategic contractor partnerships, and in-house material procurement, facilitating cost optimisation. These factors position Lagenda as the highest ROE performer, yielding 16% among affordable property developers and across our broader developer universe.
- **We believe the recent market reaction to the Malaysian Anti-Corruption Commission (MACC) investigation involving senior personnel of the company has presented a favourable opportunity to consider investing.** Lagenda's fundamental strengths remain intact, with a high dividend yield of 5-7% and a PE of 4-7x for 2024-26. Note that as far as we are aware, the scope of the investigation is limited to specific senior management personnel, and does not involve Lagenda itself. Importantly, Lagenda reiterated that as far as it is aware, the land under investigation does not belong to the company, and its day-to-day business operations continue without disruption. We forecast Lagenda's revenue/earnings to grow at a three-year CAGR of 27%/28% respectively to 2026. This is supported by yearly sales growth of around 15% to RM1.6b by 2026, driven

by more launches totalling RM1.9b-2.4b, as well as accelerated progressive billings. Lagenda's sales target of RM1.2b for 2024 (+15% yoy) will be supported by its aggressive 2024 launches amounting to RM2b (2.6x the size of the 2023 launches).

### SHARE PRICE CATALYST

- **Event:** Better 2H24 earnings.
- **Timeline:** 2H24 results announcement.

### Pekat Group – BUY (Chong Lee Len)

- **Capitalising on structural growth of solar market.** We believe Pekat's well-founded market competitiveness in the solar market allows it to capitalise on the enormous growth in solar energy demand. Pekat also aims to tap the huge replenishment opportunities arising from the upcoming engineering, procurement, construction and commissioning awards of Corporate Green Power Programme and Large-Scale Solar 5 (LSS5).
- **Building up recurring income assets.** Through its 45%-owned associated company MFP Solar, Pekat is gradually building up a recurring income stream. Pekat has also emerged as one of the asset owners under the corporate green power programme (CGPP), having secured a 29.99MW plant through another subsidiary.
- **M&A-fuelled growth.** The upcoming acquisition of switchgear supplier EPE Switchgears may also further propel its growth momentum. We raised our 2025-26 earnings forecasts by 30% and 15%, incorporating the successful acquisition exercise by Nov 24.
- **Maintain BUY and target price of RM1.15,** pegged to 2025F mean PE of 25x.

### SHARE PRICE CATALYST

- **Event:** Stronger-than-expected earnings growth from main customers, EPE Switchgear acquisition, winning EPCC contracts, winning LSS5 contracts.
- **Timeline:** 4Q24-2025.

### RGB International– BUY (Jack Goh)

- **Well-positioned to capture the exponential slot machine growth in ASEAN gaming jurisdictions.** The ASEAN gaming scene, especially in the Philippines, remains highly charged with aggressive gaming capacity expansion and post-pandemic replacement cycle. Hence, RGB is poised to largely benefit from this trend. Note that RGB has >70% market share in the Indochina and the Philippines' slot machines markets.
- **Sequential years of lucrative earnings base in the making; on track for record-high earnings in 2024.** RGB's sales, support and marketing division is poised to deliver sales of about 4,500 slot machines for 2024 (vs 1,500-1,700 units before the COVID-19 pandemic). Meanwhile, the concession-based technical support and management division has been recovering progressively and is set to recover to 80-90% of 2019's profitability levels in 2024. Including RM8m-12m in interest income (5% interest on RM160m-246m net cash) and contributions from the engineering services division, RGB is forecasted to achieve a record-high profit of RM113m in 2024.
- **On cloud nine after securing massive SSM orderbook from PACGOR.** At end-May 24, RGB revealed that the group secured a RM383m (US\$81.3m) contract from Philippine Amusement and Gaming Corporation (PAGCOR) to supply 1,968 electronic gaming machines and accessories. We believe this is to support PACGOR's modernisation programme which includes revamping the gaming floor and rolling out new slot machines ahead of the privatisation of its casino operations. We expect these orderbooks to be fulfilled and translated into RGB's earnings in 2Q-3Q24, which will pave the way for RGB to deliver meaningful qoq earnings growth in the upcoming quarters.
- **Deep-in-value financial matrixes reaffirm our investment thesis.** Despite a >40% ytd

share price rally, RGB's bargain valuations of 6x 2024F PE (4x ex-cash PE) still offer palatable potential capital upside. More importantly, RGB's current net cash of about RM185m (27% of market cap) is more than sufficient to support our 40% dividend payout forecasts and lush yields of 7-8% in 2024-25. Should management raise the dividend payout ratio to 50%, prospective yields will likely be 8-10%.

- **Maintain BUY and target price of RM0.66**, which implies 9x 2024F PE (pre-pandemic mean), 4x 2024F ex-cash PE, and 4.5x 2024 EV/EBITDA.

#### SHARE PRICE CATALYST

- **Event:** Stronger earnings in 2024 backed by resilient orderbook.
- **Timeline:** 2H24 earnings will reflect strong growth.

#### RHB Bank – BUY (Keith Wee)

- **Asset quality has stabilised.** The group's gross impaired loan (GIL) ratio improved to 1.76% in 2Q24 from 1.83% in 1Q24. Management indicated that with the anticipated resolution of several domestic corporate loans in the hospitality sector, the GIL ratio is expected to trend down further in 2H24, potentially reaching around 1.60%.
- **Credit cost trending downwards.** Despite additional general provisions to raise LLC, management remains confident in achieving its 20-25bp net credit cost target for 2024. In 1H24, net credit cost was 30bp, including one-off provisions for several Thai and Singapore impaired loans, which are non-recurring. Excluding these, the normalised net credit cost was 24bp, improving from 25bp in 1Q24 to 23bp in 2Q24. With improving delinquency rates, management expects 2H24 net credit cost to trend towards 20bp.
- **NIM on track to improve.** Disciplined loan and deposit pricing, along with steady growth in retail CASA, is expected to support further NIM improvement. The group recorded a 6bp qoq increase in 2Q24 NIM, reaching 1.89%. Management anticipates 3Q24 NIM to remain stable and has maintained its full-year guidance of 1.88-1.90%, recently raised from 1.80-1.90%. With a 1H24 NIM of 1.86%, the group will need to achieve a NIM of 1.90-1.94% in 2H24 to meet its full-year NIM target of 1.88-1.90%. Key drivers of this recovery include shedding costly corporate deposits, gradually reducing deposit campaign rates and sustaining strong retail CASA growth (1H24: +10.7% yoy).
- **Non-interest income momentum to sustain in 2H24.** The group posted a strong 41% yoy growth in non-interest income in 1H24, driven by fee income (+28%), forex gains (+260%), and trading income (+20%). Stronger fee income from increased loan disbursement fees is expected to offset the weaker forex gains. If the group sustains this level of non-interest income generation in 2H24, full-year non-interest income could grow by 20%, vs the current 7% forecast, potentially delivering a 6% earnings upside surprise.
- **Potential capital management.** With a strong CET1 ratio of 16.5%, there is room for potential capital management optimisation. We currently project a 50% full cash dividend payout ratio, which offers a 6% yield and is one of the highest in the sector. Hypothetically, if the group were to increase its payout ratio to 62%, like in 2023 when the dividend reinvestment plan was active, it could result in a highly attractive cash dividend yield of 7.5%
- **Maintain BUY and target price of RM6.80 (0.90x 2025F P/B, 10.0% ROE).** The stock is currently trading at a highly attractive 0.80x P/B, well below the sector average of 1.24x, despite delivering similar ROE. This makes RHB a clear value laggard, with current valuations at -1SD to its historical P/B mean. With asset quality metrics now stabilised and strong pre-provision growth of 13%, we believe the stock is poised to outperform the sector in 2H24, further reinforced by its high beta.

### SHARE PRICE CATALYST

- **Event:** a) Stronger-than-expected loans growth, and b) lower-than-expected provisions.
- **Timeline:** 3-6 months.

### Sime Darby – BUY (Anas Fitri Ahmad)

- **Anticipated earnings lift from UMW's contribution and China market recovery.** We anticipate Sime Darby's earnings to improve by 27% yoy in FY25, driven by earnings accretion from UMW Holdings along with the recovery in the China market. UMW's growth, particularly driven by Toyota and Perodua, has shown promising performance, with sales volume increasing by 11% yoy in 8M24, driven by higher Perodua sales. Based on channel checks, demand for both brands remains robust with healthy replenishment of new orders.
- **Recovery in China market.** We estimate the contribution from the China market for both industrial and motors segments to improve by 3% yoy in FY25. Notably, the China market accounted for 12% of the industrial segment's total revenue (the second largest revenue contributor) and 40% of the motor segment's total revenue (the largest revenue contributor). We understand that the China market will continue with price discounts in the near term due to overcapacity and strong competition despite improvement in sales volume; however we expect a recovery in the China market in FY25.
- **Improvement in industrial orderbook.** Its orderbook improved by 2.5% qoq in 4QFY24. Moving forward, we expect the orderbook to remain stable at RM4.2b-4.3b and then increase in FY25, further supported by healthy demand for mining equipment due to: a) higher commodity prices, b) improvement in infrastructure projects and data centre construction in Malaysia and Singapore, c) contribution from Cavpower in FY25, as well as d) recovery in China's construction industry.
- **Maintain BUY with a target price of RM3.13,** pegged to 12.2x PE (five-year mean) to 25.6 sen of FY25F EPS.

### SHARE PRICE CATALYST

- **Event:** a) Stronger vehicle sales volume and demand, b) higher commodity prices driving a robust orderbook for the industrial division, and c) recovery in the Chinese market.
- **Timeline:** 1HFY25 results announcement.

### VS Industry – BUY (Desmond Chong)

- **New Philippines venture to capture lion's share of market.** As part of VSI's customer diversification strategy, the group has incorporated a new subsidiary in the Philippines to take on additional orders from this key customer. Note that the group will rent a 560,000sf factory which is capable of generating up to RM2b of yearly revenue in a blue-sky scenario.
- **On a stronger regional foothold to spearhead growth.** While we are cognisant of the execution risk considering the different market landscapes, we are net positive to VSI's diversification into the Philippines considering: a) stronger orders visibility, b) its vast experience in supporting its key customers' sub-operations, c) favourable export tariffs from the Philippines to the US, d) margin enhancement on the cross-selling of its new capabilities, and e) more job tender wins on multi-site offerings. More so, the adoption of an asset-light model could lead to a lower breakeven point for margin accretion. In terms of upside potential, the factory building size of about 570,000sf is capable of generating RM2b revenue size on full utilisation.
- **Eyeing new contracts; discussions still in the infancy stage.** We understand that VS is still being approached by new MNC customers, with discussions of prospective contracts at the early stages of evaluation.

- **Maintain BUY with a target price of RM1.42** based on 18.5x FY25F PE (on average five-year forward PE).

### SHARE PRICE CATALYST

- Event: a) Stronger-than-expected earnings delivery from main customers, and b) new customer acquisition.
- Timeline: 6-9 months.

### Yinson – BUY (Kong Ho Meng)

- **Progress of unlocking the true value of its FPSO division (ie Yinson Production).** Bloomberg in early-24 broke the news that Yinson is considering a pre-IPO funding round for its FPSO subsidiary of up to US\$1b, before a US IPO plan by 2026. One of its key private equity investors RRJ Capital, which had invested US\$0.3b in FPSO Agogo, was said to be planning to invest another US\$0.32b in this funding round. This is despite Yinson's renewables and green mobility businesses still being in their infancy stages.
- **Announced RM160m divestment of its OSV business to Icon Offshore.** The divestment is a clear sign that Yinson is repositioning itself as a pure-play FPSO and energy transition global player, although Yinson will still hold an indirect associate stake as the Lim family will be responsible for Icon Offshore's long-term value.
- **Clear signal to the market that the FPSO division is heavily undervalued.** Yinson recently executed many share buybacks, as a signal to the market that its market capitalisation of US\$2b is at a hefty discount, relative to our own FPSO valuation of close to US\$3b. This was due to: a) its loan base surging to RM16b due to many new capex-heavy FPSO projects, and b) confusing leverage ratios between accounting disclosure (finance lease method) vs operating lease. We believe Yinson is undertaking a voluntary accounting disclosure, emulating SBM Offshore's example, to improve investor transparency
- **Near-term events: First oil of FPSO Atlanta and FPSO Maria Quiteria.** Both Brazil FPSOs were delivered according to schedule and are expected to commence charter by early-25. However, we now understand that FPSO Atlanta's first oil may be pushed back to Dec 24 or 2025. This was likely due to regulatory delays (Brazil's environmental agency IBAMA went on strike since early-24).
- **Maintain BUY with a SOTP target price of RM3.90**, which implies 18x FY25F PE, or 10x long-term PE once FPSO Agogo fully contributes to earnings by FY27. We continue to favour the group for its execution, efficient capital management and bold ESG strategy to be a winner in the energy transition. As long as these stand, its balance sheet leverage (ie net debt) will not exceed 5x on peak EBITDA within five years.

### SHARE PRICE CATALYST

- Event: a) Timely start-up and divestments of existing projects, b) more value-adding, less capex-heavy projects such as green modifications, and c) faster monetisation of non-O&G projects in the renewables and Greentech space.
- Timeline: 3-9 months.

## Disclosures/Disclaimers

This report is prepared by UOB Kay Hian Private Limited ("UOBKH"), which is a holder of a capital markets services licence and an exempt financial adviser in Singapore.

This report is provided for information only and is not an offer or a solicitation to deal in securities or to enter into any legal relations, nor an advice or a recommendation with respect to such securities.

**This report is prepared for general circulation.** It does not have regard to the specific investment objectives, financial situation and the particular needs of any recipient hereof. Advice should be sought from a financial adviser regarding the suitability of the investment product, taking into account the specific investment objectives, financial situation or particular needs of any person in receipt of the recommendation, before the person makes a commitment to purchase the investment product.

This report is confidential. This report may not be published, circulated, reproduced or distributed in whole or in part by any recipient of this report to any other person without the prior written consent of UOBKH. This report is not directed to or intended for distribution to or use by any person or any entity who is a citizen or resident of or located in any locality, state, country or any other jurisdiction as UOBKH may determine in its absolute discretion, where the distribution, publication, availability or use of this report would be contrary to applicable law or would subject UOBKH and its connected persons (as defined in the Financial Advisers Act, Chapter 110 of Singapore) to any registration, licensing or other requirements within such jurisdiction.

The information or views in the report ("Information") has been obtained or derived from sources believed by UOBKH to be reliable. However, UOBKH makes no representation as to the accuracy or completeness of such sources or the Information and UOBKH accepts no liability whatsoever for any loss or damage arising from the use of or reliance on the Information. UOBKH and its connected persons may have issued other reports expressing views different from the Information and all views expressed in all reports of UOBKH and its connected persons are subject to change without notice. UOBKH reserves the right to act upon or use the Information at any time, including before its publication herein.

Except as otherwise indicated below, (1) UOBKH, its connected persons and its officers, employees and representatives may, to the extent permitted by law, transact with, perform or provide broking, underwriting, corporate finance-related or other services for or solicit business from, the subject corporation(s) referred to in this report; (2) UOBKH, its connected persons and its officers, employees and representatives may also, to the extent permitted by law, transact with, perform or provide broking or other services for or solicit business from, other persons in respect of dealings in the securities referred to in this report or other investments related thereto; (3) the officers, employees and representatives of UOBKH may also serve on the board of directors or in trustee positions with the subject corporation(s) referred to in this report. (All of the foregoing is hereafter referred to as the "Subject Business"); and (4) UOBKH may otherwise have an interest (including a proprietary interest) in the subject corporation(s) referred to in this report.

As of the date of this report, no analyst responsible for any of the content in this report has any proprietary position or material interest in the securities of the corporation(s) which are referred to in the content they respectively author or are otherwise responsible for.

**IMPORTANT DISCLOSURES FOR U.S. PERSONS**

This research report was prepared by UOBKH, a company authorized, as noted above, to engage in securities activities in Singapore. UOBKH is not a registered broker-dealer in the United States and, therefore, is not subject to U.S. rules regarding the preparation of research reports and the independence of research analysts. This research report is provided for distribution by UOBKH (whether directly or through its US registered broker dealer affiliate named below) to "major U.S. institutional investors" in reliance on the exemption from registration provided by Rule 15a-6 of the U.S. Securities Exchange Act of 1934, as amended (the "Exchange Act"). All US persons that receive this document by way of distribution from or which they regard as being from UOBKH by their acceptance thereof represent and agree that they are a major institutional investor and understand the risks involved in executing transactions in securities.

Any U.S. recipient of this research report wishing to effect any transaction to buy or sell securities or related financial instruments based on the information provided in this research report should do so only through UOB Kay Hian (U.S.) Inc ("UOBKHUS"), a registered broker-dealer in the United States. Under no circumstances should any recipient of this research report effect any transaction to buy or sell securities or related financial instruments through UOBKH.

UOBKHUS accepts responsibility for the contents of this research report, subject to the terms set out below, to the extent that it is delivered to and intended to be received by a U.S. person other than a major U.S. institutional investor.

The analyst whose name appears in this research report is not registered or qualified as a research analyst with the Financial Industry Regulatory Authority ("FINRA") and may not be an associated person of UOBKHUS and, therefore, may not be subject to applicable restrictions under FINRA Rules on communications with a subject company, public appearances and trading securities held by a research analyst account.

**Analyst Certification/Regulation AC**

Each research analyst of UOBKH who produced this report hereby certifies that (1) the views expressed in this report accurately reflect his/her personal views about all of the subject corporation(s) and securities in this report; (2) the report was produced independently by him/her; (3) he/she does not carry out, whether for himself/herself or on behalf of UOBKH or any other person, any of the Subject Business involving any of the subject corporation(s) or securities referred to in this report; and (4) he/she has not received and will not receive any compensation that is directly or indirectly related or linked to the recommendations or views expressed in this report or to any sales, trading, dealing or corporate finance advisory services or transaction in respect of the securities in this report. However, the compensation received by each such research analyst is based upon various factors, including UOBKH's total revenues, a portion of which are generated from UOBKH's business of dealing in securities.

Reports are distributed in the respective countries or jurisdictions by the respective entities and are subject to the additional restrictions listed in the following table.

General	This report is not intended for distribution, publication to or use by any person or entity who is a citizen or resident of or located in any country or jurisdiction where the distribution, publication or use of this report would be contrary to applicable law or regulation.
Hong Kong	This report is distributed in Hong Kong by UOB Kay Hian (Hong Kong) Limited ("UOBKHHK"), which is regulated by the Securities and Futures Commission of Hong Kong. Neither the analyst(s) preparing this report nor his associate, has trading and financial interest and relevant relationship specified under Para. 16.4 of Code of Conduct in the listed corporation covered in this report. UOBKHHK does not have financial interests and business relationship specified under Para. 16.5 of Code of Conduct with the listed corporation covered in this report. Where the report is distributed in Hong Kong and contains research analyses or reports from a foreign research house, please note: (i) recipients of the analyses or reports are to contact UOBKHHK (and not the relevant foreign research house) in Hong Kong in respect of any matters arising from, or in connection with, the analysis or report; and (ii) to the extent that the analyses or reports are delivered to and intended to be received by any person in Hong Kong who is not a professional investor, or institutional investor, UOBKHHK accepts legal responsibility for the contents of the analyses or reports only to the extent required by law.
Indonesia	This report is distributed in Indonesia by PT UOB Kay Hian Sekuritas, which is regulated by Financial Services Authority of Indonesia ("OJK"). Where the report is distributed in Indonesia and contains research analyses or reports from a foreign research house, please note recipients of the analyses or reports are to contact PT UOBKH (and not the relevant foreign research house) in Indonesia in respect of any matters arising from, or in connection with, the analysis or report.
Malaysia	Where the report is distributed in Malaysia and contains research analyses or reports from a foreign research house, the recipients of the analyses or reports are to contact UOBKHM (and not the relevant foreign research house) in Malaysia, at +603-21471988, in respect of any matters arising from, or in connection with, the analysis or report as UOBKHM is the registered person under CMSA to distribute any research analyses in Malaysia.
Singapore	This report is distributed in Singapore by UOB Kay Hian Private Limited ("UOBKH"), which is a holder of a capital markets services licence and an exempt financial adviser regulated by the Monetary Authority of Singapore. Where the report is distributed in Singapore and contains research analyses or reports from a foreign research house, please note: (i) recipients of the analyses or reports are to contact UOBKH (and not the relevant foreign research house) in Singapore in respect of any matters arising from, or in connection with, the analysis or report; and (ii) to the extent that the analyses or reports are delivered to and intended to be received by any person in Singapore who is not an accredited investor, expert investor or institutional investor, UOBKH accepts legal responsibility for the contents of the analyses or reports only to the extent required by law.
Thailand	This report is distributed in Thailand by UOB Kay Hian Securities (Thailand) Public Company Limited, which is regulated by the Securities and Exchange Commission of Thailand.
United Kingdom	This report is being distributed in the UK by UOB Kay Hian (U.K.) Limited, which is an authorised person in the meaning of the Financial Services and Markets Act and is regulated by The Financial Conduct Authority. Research distributed in the UK is intended only for institutional clients.
United States of America ('U.S.')	This report cannot be distributed into the U.S. or to any U.S. person or entity except in compliance with applicable U.S. laws and regulations. It is being distributed in the U.S. by UOB Kay Hian (US) Inc, which accepts responsibility for its contents. Any U.S. person or entity receiving this report and wishing to effect transactions in any securities referred to in the report should contact UOB Kay Hian (US) Inc. directly.
